

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. (currently amended) A process for, after processing of at least one silver image and digitizing said at least one image by a laboratory, making the at least one digital image available to a user on a server without the user's a message service address e-mail address being accessible to anyone other than processing laboratory personnel ~~the at least one digital image being obtained by processing at least one silver image and digitizing the at least one silver image to create said at least one digital image,~~ the process comprising:

receiving in a call center managed by the processing laboratory a code sent from a terminal by ~~a~~ the user via a telephone call ~~or a mobile Internet session~~ which identifies at least one image which is to be processed;

recovering a number which uniquely identifies respectively the terminal by means of which the user sent the code and a place where the telephone call is coming from;

associating the code identifying said at least one image with the number identifying the terminal and the place where the telephone call is coming from;

defining an address on the server by integrating the number identifying the terminal; and

storing the at least one image at the defined address ~~stored~~ on the server after processing.

2. (currently amended) The process of claim 1, wherein the receiving step comprises automatically recovering, during the call ~~or the mobile Internet session~~, the user's telephone number.

3. (original) The process of claim 1, wherein the code identifying said at least one image is a number associated with a support on which said at least one image to be processed is found.

4. (original) The process of claim 3, wherein said at least one image to be processed is a digital image.

5. (original) The process of claim 3, wherein the code identifying said at least one image is a number of an APS cartridge on which said at least one image to be processed is found.

6. (previously amended) The process of claim 1, wherein the code identifying said at least one image is a number of an envelope into which is inserted a film support to be processed on which said at least one image is found for transmitting to a processing laboratory.

7. (previously amended) The process of claim 6, wherein the code identifying said at least one image further comprises a number identifying a place where the envelope was handed in by the user.

8. (canceled)
